Sketch

Digital

Jhoany Chong

Print Layout Project

My
name
is Jhoany
Chong and my
current major is Graphic
Design. I'm taking this class
to get a basic knowledge of Adobe
programs and get into the digital world. In
addition, it is a requirement for the degree of
Graphic Design. My goal is to get my Graphic
Design degree and transfer to a University to
get my Industrial Design degree or to get a job
with my Graphic Design degree and get to the
Art Director position.

WORLD DESTRUCTION

Adobe Photoshop Project

Jhoany Chong / 3

In
this
Photoshop
project, I wanted
to illustrate a genre of
fantasy. One of my favorite
tool in Photoshop was the blur tool.
It helps to blend those sharp borders.
Moreover, the opacity helped me achieve The
Portable Network Graphics (.png) images format
made it easier to copy and paste to my project
without using 'Lasso Tool' or the 'Magic Wand'.
My project was inspired by 'Avatar: The Last
Airbender', but instead of air, it was water. One
thing I want to learn is to draw in Photoshop.

Adobe Photoshop

Adobe Illustrator Project

Jhoany Chong / 5

In
this
Illustrator
project, I drew
my creature and made
it digital.My character was
inspired by one of the character of
the movie 'My Neighbor Totoro'. Sadly, I
forgot to put in this project was a type. I wanted
to give like a anime illustration.
One thing that I would improve in my project
is the shadow of my creature, I would put the
shadow with less opacity.

Adobe Illustrator

Adobe Animate Project

Jhoany Chong / 7

In
this
Animate
project, I made an
animation of my crea-
ture meeting a hamster.Then,
the hamster offered my creature
his almond and asked my creature if he
wanted to be friend with him. I didn't complete
achieve my goal in this project, because I want-
ed to make it more longer and add more scenes
on the project. The scenes helped me a lot in
being more organized. I added a background
music to my animate to make it a little bit more
emotional.
